Our Story
Since 1997

GreenParking was born in the UAE a nation built on ambition, innovation, and the belief that the future can be engineered today. Our story began with a simple but bold idea that Parking should be Seamless, Savvy, Sustainable & Secure. From that idea, we built a company that does more than manage parking spaces. We manage **movement**, **flow**, **and experience**.

Every day, thousands of people enter and exit spaces we operate. Most never notice us, and that's exactly how it should be. Because when mobility works perfectly, it becomes invisible.

- We are the quiet contributors behind the UAE's progress.
- The team that arrives before the city wakes.
- The system that keeps destinations moving.
- The brand that believes service is a responsibility, not a task.

2

Chairman's **Message**

“ True innovation is not measured by the technology we create, but by the lasting value it brings to every community we serve.

GreenParking is not just a company. It is a UAE-born mobility ecosystem, engineered for a nation that leads the world in innovation. ”

Our ambition is not to conform to industry norms. It is to redefine them entirely.

GreenParking began as a solution, but it has grown into a standard.

Over time, we realized that we were not simply managing vehicles. we were managing movement, access, and the pulse of a city. As the owner, I inherit more than a business. I inherit a duty: to protect its values, expand its vision, and ensure its impact reaches far beyond the present moment.

Today, GreenParking stands as a symbol of sustainability, intelligence, and reliability. A system built for today, tomorrow, and every tomorrow after that.

Together, we are custodians of a vision built on integrity, innovation, and long-term purpose. What we create today must stand strong tomorrow. Every system we design, every site we operate, and every decision we make reflects a commitment that goes far beyond business.

THIS IS OUR PURPOSE

THIS IS OUR COMMITMENT

THIS IS OUR LEGACY IN MOTION

Rashed Ali Essa Bin Harmash
Chairman and Owner
Futurelink L.L.C

Our Philosophy

is anchored in four pillars that define who we are and how we serve.

Seamless

Frictionless entry, exit, and payment across every touchpoint.

Savvy

Technology-driven intelligence powering every operational decision.

Sustainable

Green infrastructure reducing emissions and energy consumption.

Secure

End-to-end access governance safeguarding assets, infrastructure, and operational data.

Our **Accreditations**

Who
We Are!

GreenParking by Future Link L.L.C. is a leading provider of parking management, smart mobility, EV charging infrastructure, and valet parking solutions in the UAE.

We combine advanced technology with operational excellence to deliver innovative, sustainable, and data driven parking ecosystems for commercial, residential, hospitality, healthcare, and public-sector clients

Our Vision

Leading the UAE into seamless, intelligent & Sustainable mobility future.

Enhancing urban living and supporting national growth through smart, lasting mobility and parking solutions.

Our Mission

Delivering high efficiency Parking & Mobility solutions.

Our commitment is built on:

- Smart Operations
- Compliant Audit Trails
- Eco-friendly Innovations
- Service Excellence
- Reliable Systems

What We **Offer**

- **Parking Operations**
- **Parking Technology**
- **Premium Valet**
- **EV Charging Solutions**
- **Consultation & Partnership**

- **Brand Value Protection**
- **Incident Management**
- **Focused on Resolutions**

Our Expertise & Solutions

Supply & Installation

Complete turnkey solutions covering design, supply, installation, annual maintenance, and integration with parking infrastructure.

Ev Charging Solutions Nationwide & GCC Coverage

Installed across Dubai, Abu Dhabi, other Emirates, Oman, KSA, and GCC countries, ensuring seamless EV mobility across the region with full GreenParking app access.

Parking Management Integration

Advanced automated parking management systems designed for seamless operations, efficiency, and user convenience.

Valet Parking Operations

Powered by smart valet software, digital audit trails, transparent reporting, and digital payment solutions.

Customised Solutions

Fully adaptable systems tailored to the unique layout, capacity, and operational needs of each parking facility.

Smart City Transformation

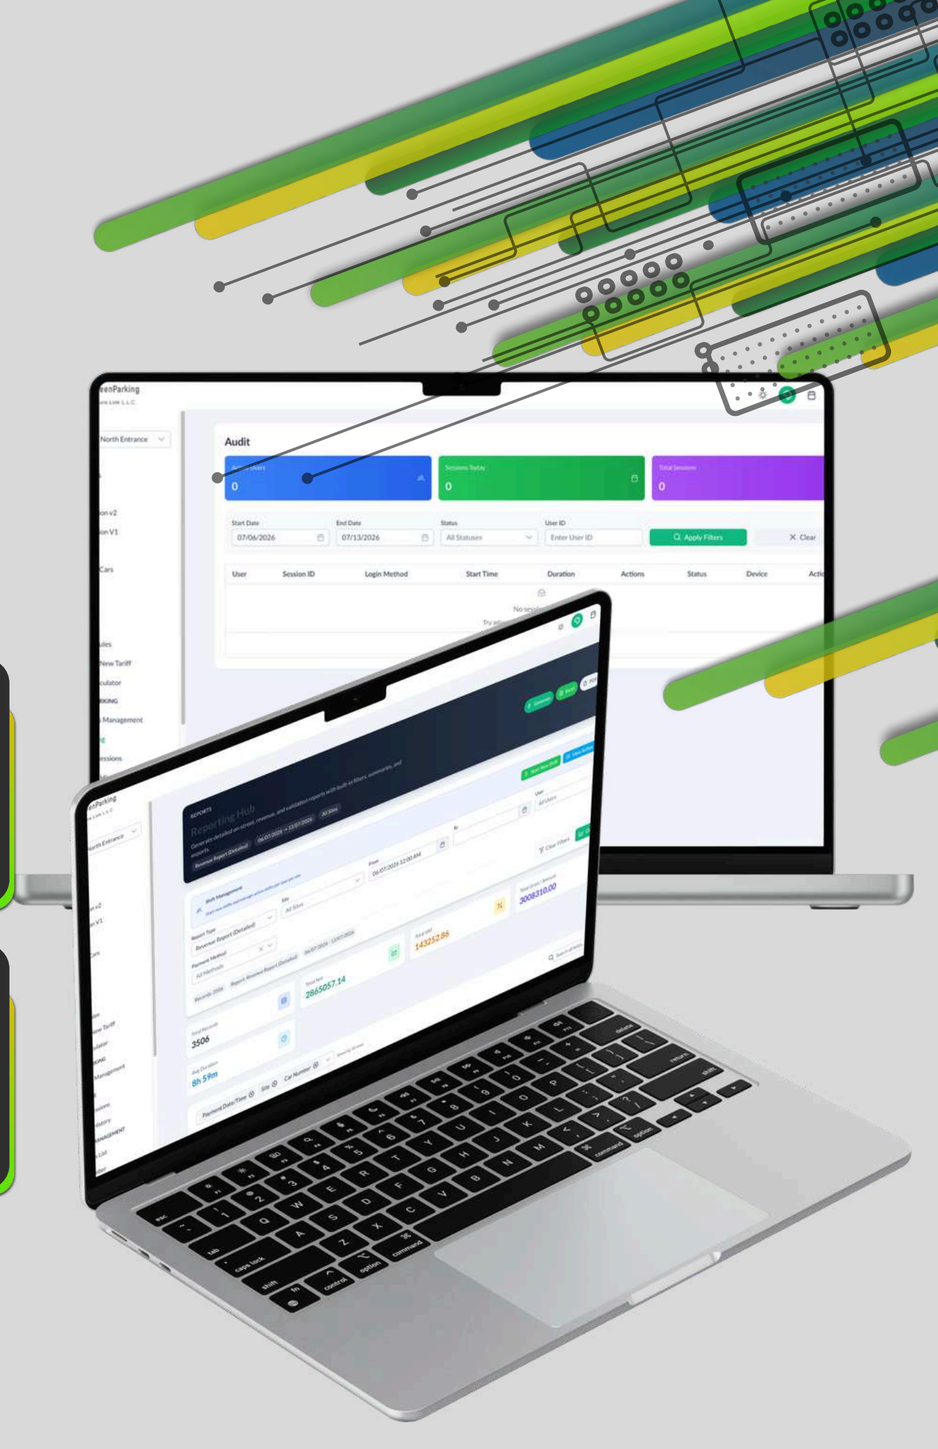

Supporting governments, developers, and homeowners in transitioning toward greener, smarter, and energy-efficient cities.

GreenParking
Parking Management Software

GreenParking's proprietary Parking Management Software delivers seamless, compliant digital operations fully customizable to your site's operational, commercial, and reporting needs.

Some of our current developments in the parking industry are listed below:

- **ANPR Integrated Access**
- **Digital Operations Center**
- **Multi Site Control**
- **Digital Payments & Cashless Operations**
- **Customizable Modules**
- **Real-Time Dashboards**

9

EV Charging **Infrastructure**

The first cross border electric vehicle charging network in the Middle East, with our EV chargers that support all known electric vehicles, available in the market.

Our EV charger infrastructure is fully supported by an online app to locate available chargers in your area. Simply create an account and apply for an EV charging card.

Smart Charging

Locate nearby chargers instantly and check realtime availability.

Digital Wallet

Simply top up your digital wallet and use any charger instantly.

Charging Card

Apply for your EV charging card digitally and start charging anywhere.

Live Availability

Monitor charger status in real time and plan your journey better.
